

**National Interagency Coordination Center  
Incident Management Situation Report  
Tuesday, May 30th, 2017 – 0530 MT  
National Preparedness Level 2**

**National Fire Activity**

Initial attack activity:	Light (78 new fires)
New large incidents:	1
Large fires contained:	1
Uncontained large fires:**	2
Area Command Teams Committed:	0
NIMOs committed:	1
Type 1 IMTs committed:	2
Type 2 IMTs committed:	0

\*\*Uncontained large fires include only fires being managed under a full suppression strategy.

New fires: 8  
 New large incidents: 1  
 Uncontained large fires: 2  
 Type 1 IMTs committed: 1  
 NIMOs committed: 1

**West Mims**, Okefenokee National Wildlife Refuge. Unified command between Florida IMT 1 (Leneave) and NIMO (Quesinberry). Sixteen miles southeast of Fargo, GA. Timber and southern rough. Minimal fire behavior with creeping and smoldering. Numerous structures threatened. Road, area and trail closures in effect.

**Dragonfly**, Florida Forest Service. Twenty-one miles northwest of Weston, FL. Tall grass. Active fire behavior. Last report unless significant activity occurs.

\* **Water Plant**, Florida Forest Service. Ten miles west of Cocoa West, FL. Southern rough. Moderate fire Behavior. Structures threatened.

**Little Creek**, Florida Forest Service. Five miles east of Lake Hart, FL. Hardwood litter and short grass. Minimal fire behavior with flanking and backing. Last report unless significant fire behavior occurs.

**Predictive Services Discussion:** The strong high pressure ridge located over the western states and Alaska will begin to weaken as a low pressure area develops off the Southern Californian coast and begins to swing inland, undercutting the ridge. The approaching low will produce scattered, mainly wet storms across New Mexico and eastern Arizona. Cooler than normal and breezy conditions will continue across the eastern half of the Lower 48 as the upper level low pressure system over the Great Lakes begins to move north and weaken. The associated cold front that is stalled over the Deep South will begin to fall apart only making it into northern Florida before doing so.

## UNFAMILIAR WITH WEATHER AND LOCAL FACTORS INFLUENCING FIRE BEHAVIOR

*Weather / Fire Behavior Category*

- Ask questions of local experts! What kinds of questions would you ask?
- Does the operational period plan give you adequate weather and information? What kinds of weather forecasts can you get? What other weather or local information do you look for in the shift plan?
- Can you get information from resources that have been on the fire? What questions will you ask of the crew that you are replacing?
- Is there any other way to obtain information? List common sources of information on weather and local factors (Examples: Web based weather Activity Planner, Point Forecast Matrix, NOAA Internet Briefing)
- To reduce risks:
  - Base all actions on current and expected fire behavior.
  - Post lookouts.
  - Establish escape routes and safety zones.
  - Take extra caution! Discuss a fire where you relied on information from the local unit (perhaps where your fire knowledge and experience was very different from how they did things—southeast or Alaska).
  - Recognize and report visual indicators (clouds, WX obs., cold front passage, inversion breaking)
